

Flexi Bill Presentment

Flexi Bill Presentment is an extension to FlexiReceivables and provides an **electronic delivery and storage solution** for Accounts Receivable communications.

Flexi Bill Presentment represents an **electronic invoicing process to reduce the time and money currently** expended to present invoices to clients, and addresses client requests for electronic delivery and storage of documents.

Organizations today are embracing a more sustainable approach to business; one that takes into account the environment and societal impact of their activities. They do this through a commitment to a **CSR (Corporate Social Responsibility)** initiative. Following and incorporating the CSR initiatives into their daily business life, an organization can operate in a "Green" manner. Flexi Bill Presentment allows organization to adhere to **lowering their carbon footprint, reducing paper and other recyclable wastes**, and thus contributing to societal improvements and responsibilities. The application contributes to all of this while improving on DSO and collection times, as well as reducing time your staff spends responding to requests from your customers and sales people.

FlexiReceivables®

FlexiReceivables, the Accounts Receivable module in Flexi's enterprise financial accounting suite FlexiFinancials, helps companies more efficiently manage their receivables from invoice processing to cash receipts, analyzing customers, credit and collection processing, sales commission tracking, and much more. FlexiReceivables together with FlexiPayables delivers a single environment to manage cash inflows and outflows with seamless refund and recoupment processing.

Today, companies are expected to do more with less, improve their processes, implement tighter controls, and provide documentation to support their business flows. They also need easier access to information to help them manage their businesses better. FlexiFinancials can help accomplish this. All of the Flexi applications use an integrated security and fully integrated functionality across the entire product suite. FlexiReceivables can operate standalone or together with FlexiLedger and FlexiPayables.

About Flexi Software

Founded in 1991, Flexi develops, markets, and supports FlexiFinancials, workflow-driven enterprise accounting solutions for companies in select industries including Banking, Insurance, and Financial Services. Flexi distributes its products directly and through strategic partnership agreements. Through many successful deployments Flexi has a proven track record of low cost of ownership, ease of use and improved business processes.
