FLexi

FlexiWorkflow™ and ePayment

FlexiWorkflow, the workflow module, and ePayment Add-On, the electronic payment review and approval extension for FlexiWorkflow, are parts of the FlexiFinancials suite of accounting applications.

FlexiWorkflow delivers a simple way to define and to manage routing of accounting documents through an approval process and store them for historical references. FlexiWorkflow is based on Microsoft SharePoint technology, with innovative features such as a drag-and-drop, Visio-like designer, email- and browser-based approvals, and tracking of bottlenecks.

ePayment streamlines your payment approval process by extending the ability to approve payments to distributed approvers through a web browser. When used internally, managers at remote locations can easily have the final approval on payments through their web browser or email. When applied to a BPO or Shared Services environment, end clients can electronically approve the payment runs produced by the administrating company before they are sent to the vendor.

PROVEN SOFTWARE TRUSTED BY WORLD-LEADING BRANDS

Founded in 1990, FlexiInternational Software™ (Flexi) has simplified accounting in industries including insurance, healthcare and financial services where speed, performance and security are paramount.

Flexi's full-featured platform has powered many high-value brands, including Fortune 10 companies and some of the world's largest banks.

- Process-Specific Approval Forms
- Send Notifications
- Invoking Other Routes
- Deploy Business Process Changes by Simply Saving Flowchart

ABOUT OUR TECHNOLOGY

Flexi's open, non-proprietary architecture is based on the latest Microsoft standards and tools. It supports industry-standard databases such as Oracle and Microsoft SQL Server and allows for easy integration through Web services. The Flexi applications utilize Microsoft SharePoint to provide browser-based, enterprise-wide content portal and workflow capabilities.
